Health & Safety is Everyone’s Responsibility

Regardless of your specific working environment, the importance of health and safety in the workplace cannot be underestimated. When planning or conducting University activities and programs, the health and safety of all faculty, staff, students and visitors must be a principal consideration.

UConn’s Health and Safety Policy highlights the University’s commitment to health and safety. It establishes expectations related to compliance with health and safety regulations and University policies, programs and procedures. Additionally, the policy clearly describes our responsibility to perform work in a safe and sensible manner and to act to ensure the health and safety of ourselves, coworkers, fellow students and all others at the University.
