

POLICY UPDATE

Policy Manager Training Launches Today

All workforce members are required to complete the 20-minute Introduction to Policy Manager Training by October 31, 2023. [Complete your training in Saba](#) today to get access to the Policy Manager System and begin browsing for policies and standards documents.

Policy Manager is available to every workforce member as soon as they complete training.

Policy Manager Soft Launch

Policy Manager has soft-launched at UConn Health with all clinical documents available in the system. **Need help finding a document? Reach out to policy@uchc.edu**. This is a phased roll-out of the software with an initial focus on getting clinical and administrative documents operational in the software.

The Policy Team is continuing to reach out to administrative units to ensure unit-level standards are migrated this fall, and will work with research and academic leadership to begin the migration process.

What is Policy Manager?

Policy Manager is a cloud-based system that will house all policy and standards documents across UConn Health in one central location. Policy Manager is searchable and designed to streamline the way we access, store, review, revise, and approve policies and other standards documents.

Check out [previous editions of the UConn Health Policy Update](#) (scroll down on linked page) for more details on Policy Manager and the policy migration project.

Who can I contact with questions?

If you have questions or feedback about Policy Manager or policy process management, please email policy@uchc.edu.
